

RISE OF THE AMAZONS

1-4

60'-90'

10+

Rise of the Amazons is a Euro style adventure game that players take up the role of one of the Amazons below, featuring different classes, characteristics and favorite gods: **Antianera** (Scout). **Penthesilea** (Warrior). **Hippolyta** (Princess). **Alcippe** (Mystic).

Along with the help of other Amazons with different classes and abilities as Antiope, Melanippe, Antimache, Otrera, Atalanta and many others, they try to dominate the ancient world facing heroes such as Hercules and Achilles, as well as monsters like Cerberus, Sphinx, Typhon, Medusa, etc, all that while the curse of the **gods of Olympus strikes!**

SUPPLY TABLE:

Supply	0	1	2	5
VP	-4VP	-2VP	0	+1VP +3VP

GAME SETUP

1. Shuffle the Common Amazon cards and place one Amazon open in the 2 corresponding positions on the board left and right, from the Amazon deck.
2. Place the event tokens in the blank positions of the board. Event tokens are then revealed.
3. Shuffle the DI cards. Each player receives as many cards as her playmat indicates.
4. Each player selects one Amazon (Warrior, Mystic, Scout or Princess) and picks up his / her own card and playmat, as well as a random Ancillary Amazon.

5. Each player receives 1 Amazon miniature, 1 special ability token, 1 Sacrifice token, 1 AP token, 1 supply token, 3 flag tokens, 1 turn token and 1 VP token of their player.
6. Each player places her Action Point token in position 10 of her playmat and the supply token in the number specified by her playmat. Each player places their VP token on the 0 space of the board's VP track and the special Ability token in the center.
7. The warrior places her miniature in a Barrack in areas A or K, the Mystic in Oracle B or M, the Scout in one of ports B, Z or I while the Princess in the Palace (central Area).
8. Depending on the god favoring each player, the players' turn tokens are placed in the designated space on the turn track, at the top of the board, as indicated in the playmat.
9. Shuffle the god cards and open the first one.
10. All players deduct 1 unit of Supply.

BOARD OVERVIEW:

The board reads as follows:

2 common Amazon locations, with different bonuses each (+2 Might on the left, +2 Cunning on the right).

A turn track with friendly gods and their effects, as well as locations for player Sacrifices.

A track for VP.

A table of VP Action rewards

A table with the conditions and rewards/penalties of each Amazonomachy.

A table with Supply rewards/penalties

The map of the game, which depicts 13 areas: 12 with the names **A, B, Γ, Δ, E, Z, H, Θ, I, K, Λ, M** and the central area with no symbol.

The 3 buildings **Oracle, Barrack and Port** are scattered throughout the board, the **urn** indicating that in that area you can replenish your supplies, as well as blank positions with the **cylix** where the event tokens are initially placed and later can be used for **Sacrifice or Flag** Actions. The Might (rhombus) and Cunning (circle) symbols in each region have different values and indicate the incremental stats (Might - Cunning) of an Event there. Where there is a border such as a wooden bridge, a stone bridge or a strip of land, the areas are bordered.

PLAYMATS OVERVIEW

Each player has a playmat showing the god favoring her in the 1st round (turn position), her 2 Special Abilities, the costs of 8 actions, 6 asymmetric non-completion Event penalties, her starting Supplies, her starting DI cards as well as an Action Point counter numbered from 0 to 11. This Action Point management is of the utmost importance for meeting the player's personal goals. The initial number of action points is 10.

PLAYING THE GAME

During her round, each player has a variety of Actions to manage that cost in Action Points, and can only select **one** of them. After the setup is complete, each player has her Basic Amazon card and an Ancillary Amazon available. All available actions are explained in the following Player Actions section.

PLAYER ACTIONS

Each player handles either her Basic or Ancillary Amazon, and/or an additional Amazon from the deck of common Amazons. Each round, they can manipulate their Amazon in an available area of the map to:

- Move** to a neighboring area 
- Complete a **Battle** Event 
- Visit an **Oracle** 
- Visit a **Port** 
- Visit a **Barrack** 
- Make a **Sacrifice** to the gods 
- Take under their control a cleared from events area (**Flag**) 
- Replenish Supplies (**Supply**) 
- Fulfill the **Amazonomachy** (included in **Battle** Action)

Each Action has a cost in Action Points, different for each Amazon. Players play in the order set up in Step 8 of the Game Setup. When the action points of all players reach 0, the round ends.

MOVE

All players have the same Move cost, 1AP. Moving is restricted to and from the bordered areas.

Move Example

The player wants to reach the port of area Z, so she moves her miniature from E to Z, deducting the necessary 1 Action point and finishing her round.

BATTLE

To resolve an Event, it is sufficient for the player to be able to collect stats (Might - Cunning) equal to or greater than the stats of the Event, increased by what the area in which she is applies.

Example of Battle

Alcippe is in area E, trying to resolve the blue Event **Sphinx**, a 2M and 4C difficulty event. Due to E region (3M 0C), the difficulty increases to 5M, 4C. The left common Amazon on the board, **Otrera**, has 4M 3C stats (+2M due to position), so together with Alcippe 1M 4C stats it reaches a total of 5M 7C. Having 8 Action points, she spends 2 on Action **Battle** and 2 on Otrera, moving the action points token to 4. She resolves the blue event, places the token she conquered in one of its playmat slots (eliminating the penalty -3VP), wins the 4VP that the event gives, closes Alcippe's card (exhausted till the end of the round) and discards Otrera that she used by opening a new one in her place, ending her turn.

BUILDINGS OVERVIEW

The buildings of the game are of three types and are scattered on the map. Players can visit them by placing their miniature on the respective building for the corresponding cost and gain a number of benefits:

Port: Moving to another port area. + 1VP 

Oracle: The player draws 2 DI cards, from which she chooses one and places the other at the bottom of the stack. It cannot be visited by the player 2 times in a row; she must either leave the area with a Move Action to a neighboring area or take any other action she wishes in the area. + 1VP 

Barrack: Special Abilities are recharged. It cannot be visited by a player with both Abilities charged. + 1VP 

Palace: Only **Oracle** and **Barrack** are located in the **Palace** area.

Note: in the 2 player game, areas **A**, **Δ**, **M** are not participating, so the available buildings are 6 and not 8.

Example Visit Port

Time to visit the port! In region **Z** where there is a port, Alcippe spends 2 Action Points and uses it to travel to Region **I**, earning 1 VP while skipping intermediate areas.

Example of Oracle Visit

In area **Γ** where she is already located, Penthesilea places her miniature on the Oracle, spending 2 AP. She draws 2 DI cards from which she picks one up and puts the other one at the bottom of the deck and finishes her turn.

Example Visit Barrack

Antianera located in area **K**, has exhausted all 2 Special Abilities. At a cost of 2 AP she replenishes them. She places her SA token at the center of the 2 Abilities and finishes her turn.

SACRIFICE

This action takes place in an area with at least 1 blank event position. It is done only through common Amazons that have the **"Sacrifice"** marked at the bottom of their card. *Some DI cards exempt this requirement.*

For each Sacrifice the player receives 2VP and selects her turn in the next round of available turn positions, so that she can enjoy the deity bonus. **Cannot select the turn position she is already in.**

Example of Sacrifice

Area I has a blank event position, so in this gap Alcippe can Sacrifice to Ares god by using the left common Amazon **Iphito** allowing it, placing her **Sacrifice token** in 4th place (round token position). She spends no Action Points due to Class for that Action, only Iphito's 1 AP, while earning 2 VP. She discards Iphito that she used by opening a new one in her place, ending her turn. In the next round she will play last but will enjoy 1 extra free Action.

FLAG

This action takes place in an area with **all** event positions empty. It is done only through common Amazons that have the **"Flag"** on the bottom of their card. *Some DI cards exempt this requirement.*

It receives 1 or 2 VP for each **Flag** (if the region had 1 or 2 events, respectively).

IMPOTANT: It also receives an extra 1VP every time an opponent passes by. The opponent does not give his own VP. Flag tokens are a maximum of **3** per player.

Example of Flag

Alcippe has cleared area E from the event, so she is allowed to conquer it with the help of **Lysippe**, which has the corresponding **Flag** property. She places her Flag token in the empty event position, spends 2 Action points, discards Lysippe for another 1AP, puts a new one in her place, gets 1VP (because the event resolved there was 1) and finishes her turn. By the end of the game, whenever an opponent passes through that area, Alcippe will receive 1VP (the opponent does not lose it).

SUPPLY

Each class has a different starting **Supply**:

Warrior: 3 Supplies, Scout: 4 Supplies, Princess: 3 Supplies, Mystic: 4 Supplies

From the beginning of Round 1 and in each round, supplies are reduced by 1. Supplies are necessary for players to travel to victory as they affect their final VP and are required in **Amazonomachy** (see below). If the supplies fall to zero, the player cannot claim the victory in the end. In order for a player to make the **Supply** action, she must be in an area with the icon of the **urn**, and the common Amazon Alcyonoe must be available. *Some DI cards make obtaining supply easier.*

Example of Supply

The player uses the right common Amazon Alcyonoe with "Supply" labeled to raise their supplies on the board from 2 to 3, spending 1AP for the Amazon and 1 AP for the **Supply** Action, down from 8 to 6 Action Points.

AMAZONOMACHY

Hercules, as part of his "labors", undertook to steal the band of the queen of the Amazons, Hippolyta. During this campaign Theseus, who accompanied Hercules, stole an Amazon, Antiope. This triggered the Amazon attack on Athens. The so-called "Amazonomachy" that followed is one of the basic founding myths of Athens and Classical Greek antiquity. So important, that the Athenians depicted it on west metopes of the Parthenon temple (Acropolis Athens).

In the game the Amazons do not attack Athens specifically, but they must fulfill one of the 4 conditions of **Amazonomachy**. It is included in the **Battle** action, while its non-completion penalty is -5VP. These conditions are illustrated in the table below:

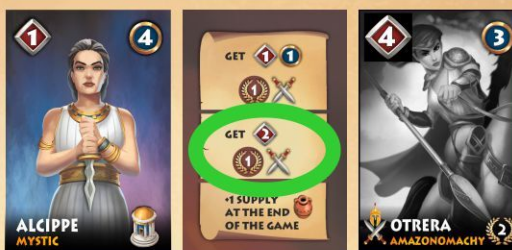

Each player completes one of these available battles, places their respective tokens in the round that they have resolved it, and receive the corresponding VP. Fulfilled Amazonomachies are not available to other players.

Example of Amazonomachy

We are in Round 2, and Alcippe wants to accomplish **Amazonomachy**. On the left is **Otrera**, with "Amazonomachy" at the bottom of her card. Her stats are 4M 3C (+2M due to position), which together with Alcippe it reaches 5M 7C. They are enough for the 3rd Amazonomachy and 3VP, but she also has a useful DI card: +2M at a cost of 1 Action point. She now reaches 7M 7C, completing the 1st Amazonomachy for 4VP, removing 2AP from **Battle** Action as well as 1 supply unit, 1AP for DI card use and 2AP for using Otrera to reach from 8 Action Points to 3. Other players can only fulfill the rest of the options now.

AMAZONOMACHY				
-1 SUPPLY		-5 VP END GAME		
1ST	2ND	3RD		
6	6	+3VP		+5VP
6	5	+2VP	+3VP	+4VP
5	6	+2VP	+3VP	+4VP
5	5	+1VP	+2VP	+3VP

SUPPLY				
0	1	2		4
	-4VP	-2VP	0	+1VP
				+3VP

Alternative Actions

If a player **passes**, then she tilts her miniature and is the turn of the next player. Other players cannot pass until she plays again. She cannot pass 2 consecutive times. Players can additionally spend 1AP for +1VP instead of Action. Finally, it is also possible to discard 2 DI cards and win 1 AP.

EVENT CARDS OVERVIEW

In the 3 rounds of the game, there are a total of 20 Events that need resolving. These events are of 5 categories (colors), 4 of each category. These cards indicate the name, the level of difficulty (Might and Cunning stats), the category (color-symbol) and the winning points.

TURN TRACK

At the beginning of the game, each Amazon starts from the position determined by the deity that favors it (listed on her playmat).

The turn track, apart from player order, defines what bonus each player may have. Each place regards a bonus that some Amazon-friendly deity offers. In the first round the bonuses are given by default to each listed god each player has (denoted by an open player token in place), but in the subsequent rounds one has to make the **Sacrifice** Action in order to enjoy them. If she doesn't make a Sacrifice, she keeps her turn but not the bonus. She cannot make a Sacrifice and secure the position she is already on.

If a player has not made a Sacrifice and is affected by changes in the order of the rest, then the player on his right decides where to place them, without naturally enjoying the bonus. If the Sacrifices of the rest do not affect her, she remains in the same position without the bonus.

From first to last, the track gives:

1st: Hecate: Negates Divine Conditions.

2nd: Cybele: +1 DI card.

3rd: Artemis: +1 Action Point.

4th: Ares: +1 free Action.

(more in GODS OVERVIEW section)

At the end of the third and final round, the player's position gives a different VP bonus according to the track, meaning the last **Sacrifice** Action results in extra VP.

AMAZON CARDS OVERVIEW

There are 15 Amazon cards in the game: 4 Basic, 4 Ancillary and 7 Common.

Basic Amazons: Each card mentions its name, class, starting building and its stats (Might and Cunning) that serve to fulfill the Events. They are visible to everyone, and close when used.

They have 2 Special Abilities each, which can be done at the same time:

Alcippe (Mystic):

1. **Ignores territory stats:** Each area, due to terrain, weather conditions, etc. increases the statistics of an event. When it comes to **Battle** action, the Mystic can deal with that Event without increases the area.

Example: Alcippe is located in area B, wanting to resolve the purple Event **Cerberus** (4M 3C). Due to territory conditions, it rises to 4M 5C, and she cannot resolve it with the help of neither the common Amazons. By using her SA, the 2C is not added to the difficulty and Cerberus remains at 4M 3C. She moves the SA token to the left and can now fight Cerberus.

2. **Attract a quest token:** She can attract a token of events to her location, from anywhere on the map. The area to be located must have at least one event position empty. It doesn't count as action.

Example: Our Mystic lies in area Δ, were 1 Event has been resolved. The other one is a red one, which she does not need. There are some around, but she craves for a yellow one. The nearest (and last) yellow Event is at area M, where Hippolyta lies waiting to resolve it on her turn. Using this ability, she attracts the yellow token from area M to area Δ, places it at the blank spot, moves the SA token to the right and she now can spend her Action to resolve it.

Penthesilea (Warrior):

1. **1 extra Battle for free:** In addition to the allowed Action, the warrior can wage an extra **Battle** that does not count as action and does not cost Action Points.

Example: After making a **Move** Action from area Z to area H, the Warrior wants to tame Pegasus who lies there. The Action has been made, but her ability allows for an extra **Battle** Action that does not cost 1AP; however, using a common Amazon has to be compensated. She moves the SA token to the left and the taming begins.

2. **Attack an Adjacent area:** The warrior can resolve a neighboring area Event without moving. The terrain difficulty is that of the neighboring area, not the one she is located. It is not affected by the presence of another Amazon. It counts as Action.

Example: Penthesilea is in area Δ, with only yellow and purple Events available. She needs a red one to cover on her playmat, so she makes use of her 2nd SA to attack the red Event Minotaur (2M 4C) at neighboring area E. She is not bothered from Hippolyta being there. The terrain difficulty is of Area E (3M 0C), raising the Event to **5M 4C**. Her only Amazon left is Antiope, along with Alcynoe they have a total of 4M 4C; so it is a good chance to spend a DI card, to get another 1M 1C for a total of 5M 5C. The Minotaur now can be defeated, leaving Penthesilea with 4VP, while she spends 1AP for Alcynoe, 1AP for the **Battle** action and 1AP for the DI card. The DI card is discarded, Alcynoe is discarded and replaced by a fresh common Amazon, Antiope is turned face down and the SA token is moved to the right. The Event card is placed in front of the player and the red Event token onto the playmat, to cover a -4VP penalty, thus ending her turn.

Hippolyta (Princess)

1. **Rearrange available Amazon cards:** The Princess has the ability to collect all available Common Amazon cards (the 2 open and those not yet played), place whoever she wants in the 2 positions on the board, and leave the rest to use. It doesn't count as Action.

Example: On her next turn, the Princess was about to make a **Supply** Action, but Alcynoe has just been discarded by the previous player, using all available amazons and making the common Amazon deck shuffled and ready again. To try and fix things, Hippolyta uses this ability: she moves the SA token to the left, takes all available common Amazons, places Alcynoe to the right slot on the board and Otrera

to the left, and the rest face down. To make things certain, she also spends a DI card for the “Reserve Amazon until your next Action” choice for 1AP, preventing the other players from using her and also blocking the Cunning-bonus space. Alcynoe is placed face down until Hippolyta plays again.

2. **Available Amazon with no cost:** Using one of the 2 available common Amazons from the board at no cost. It doesn't count as Action.

Example: On her next turn, Hippolyta places Alcynoe face up and is ready for a **Supply** Action on area K. Having way too few Action points, her second SA lets her make the **Supply** Action spending only 1AP for the Action and no AP for Alcynoe. The supply token is moved from 1 to 2, the AP token from 2 to 1, The SA token is removed from the playmat; abilities have to be recharged at a **Barrack** to be used again.

Antianera (Scout)

1. **Rearrange a pile of Event cards:** The Scout has the ability to collect all available cards in one color and place whatever she wants in the top position. It doesn't count as Action.

Example: On her next turn, the Scout was about to make a **Battle** Action for the Green Event, but **Cyclops** is way too difficult to defeat in area Λ (4M 6C). To make things easier, Antianera uses this ability: she moves the SA token to the left, takes all available green Event cards, places **Procrustes** on top and the others at a sequence of her choice. To make things certain, she also spends a DI card for the “Reserve Event until your next Action” choice for 1AP, preventing the other players from resolving it and also blocking the green tokens all over the land. Procrustes is placed face down until it's Antianera's turn again.

2. **Up to 2 moves:** In addition to the allowed Action, the Scout can make 1 or 2 extra moves that do not count as Action.

Example: After defeating Procrustes, our Scout is on her way to area **Z** because **Poseidon** demands being at a **Port** (the Port in area **I** is occupied). By using this SA, she can make 2 moves to reach area **Z** in time, spending 1AP even though she made a **Battle** Action already. The SA token is removed from the playmat; abilities have to be recharged at a **Barrack** to be used again.

The Special Abilities can be used at any time during a player's turn, if available. If one is played, the Ability token is placed on it indicating the other is available. If both Abilities are played, the Ability token is removed from the playmat stating that they are exhausted until they are recharged.

Ancillary Amazons: Each card states a name and its stats (Might and Cunning) that serve only to fulfill the Events. They are visible to everyone, and close when used.

Basic and Ancillary Amazon cards are played without the cost of Action Points.

Common Amazons: Each card states a name, the cost in Action Points for her use, and her statistics (Might and Cunning) that serve to fulfill the Events. 2 of the common Amazons can be used for **Sacrifice**, the other 2 for **Flag**, 2 for **Amazonomachy** and 1 for **Supply** Replenishment. Only these are visible at the designated positions on the board, and are discarded when used.

IMPORTANT: The cards that appear in the top left and right of the board, have an increase in their stats, depending on the position: +2 Might on the left, +2 Cunning on the right. The increase is indicated by the placement of bonus M/C tokens.

DI CARDS OVERVIEW

There are 15 Divine Intervention Cards in the game. Each card has 3 options, but only one is eligible per card. The cost of using a card is 0, 1 or 2 Action Points. Players can use as many DI cards as they want in each turn.

Each class has different starting DI cards:

Warrior: 2 DI cards

Scout: 2 DI cards

Princess: 2 DI cards

Mystic: 3 DI cards

Each player can visit the **Oracle** building and draw 2 DI cards, keeping one and the other is placed at the bottom of the deck. When the deck of DI cards runs out, the discarded ones are shuffled and available again.

It is also possible to discard 2 DI cards and get +1AP.

Note: These cards are hidden from other players.

The Active options on DI cards are:

Take xM/xC. Cost 1AP, used in **Battle** Action.

Reserve a common Amazon until you play again (The card is flipped). Cost 1AP

Reserve an Event card until you play again (the card is flipped, rest of deck is unavailable). Cost 1AP

Play in a god-forbidden area. Cost 1AP

Get 2VP if you are last in the VP track. Cost 1AP

Change the position of the 2 common Amazons. Cost 1AP, used in **Battle** Action.

Do 2 Actions in a row. Cost 1AP

Teleport to any available area on the map. Cost 2AP

That's my Spot: place your miniature in the position of an opponent's miniature, moving the opponent miniature to a neighboring area of your liking. Cost 1AP, used in **Move** Action.

Use the Special Ability of an available opponent Amazon. Spends an available Special Ability of the player, the opponent is not affected. Cost 1AP

Example: Antianera wants to resolve the Event in area E, but territory stats do not allow it. Using this card, she chooses to use Alcippe's 1st Special Ability, thus spending her 2nd Ability. Now, she can cope with the Event without the region's surges.

Action **Oracle or Barrack** without using AP. Cost 0AP

Action **Oracle or Port** without AP use. Cost 0AP

Port or Barrack Action without using AP. Cost 0AP

Relax one of your exhausted Amazons. The card returns to the Amazon view. Cost 2AP.

Make **Supply** Action without using a common Amazon. Cost 1AP

Example: Antianera is located in area Z, where the symbol of the **urn** is present but Alcynoe is not available to replenish Supplies. With this card, the player can complete the **Supply** Action by paying only 1AP for the card as well as the 1AP Cost of the Action.

Steal a random DI card from an opponent. Cost 1AP

Use the stats of an opponent's available Amazon. One of the player's Amazons is exhausted, the opponent is not affected. Cost 1AP

Example: Hippolyta wants to resolve the event in Area K, but stats on (the only available) Ancillary Amazon does not allow it. Using this card, she chooses to use Penthesilea for her statistics, thus spending her own Ancillary Amazon. Now, she can handle the Event.

Make **Flag** Action without using a common Amazon. Cost 1AP

Example: Alcippe is located in area I, all events are resolved but there is no Common Amazon available that can exercise **Flag**. With this card, the player can complete the **Flag** Action, paying only 1AP for the card as well as the 2AP Action cost.

Make **Sacrifice** Action without using a common Amazon. Cost 1AP

Example: Penthesilea is located in area I, an event is resolved but there is no common Amazon available to **Sacrifice**. With this card, the player can complete the **Sacrifice** Action by paying only 1AP for the card as well as the 1AP Action cost.

Select and pick up an already played DI card. Cost 1AP

The passive options on the DI cards at the end of the game are:

-1VP

+1VP

+2VP

+1 Supply

Change the color (symbol) of an Event card

Win in the Draw

Gods Overview

There are 4 gods favoring players in the game, while another 4 are hostile towards them.

The friendly gods are:

Hecate: Negates Divine Conditions: Throughout this round, the player's actions are not affected by the restrictions and/ or penalties of the chosen hostile god.

Cybele: +1 DI card: At the beginning of the round, the player draws a DI card.

Artemis: +1 Action Point: Throughout the round, the player has the right to increase her Action Points by 1. This means that if she starts at maximum 11, she does not lose the bonus but wins later.

Ares: +1 free Action: In addition to one Allowed Action, the player can in turn do one more Action once, at no Action Points cost.

At the beginning of each round, a hostile god card is opened, listing the conditions required by each god. Anyone who fails to fulfill his will is punished accordingly (see card).

The hostile gods are:

Zeus: Region **H** is not available for this round. This includes crossing over from there. Place the black token with the X on area **H**, which remains until the end of the round. At the end of the current round, players must be in the **Palace** area. For any player who fails to do so, the VP are reduced by 2.

Poseidon: All ports are inactive for this round. Black X tokens are placed in ports and remain there until the end of the round. Other port areas options remain available. At the end of the current round, players must be in a port area (**B, Z or I**). For any player who fails to do so, the VP are reduced by 3.

Hephaestus: Areas **L and E** are not available for this round. This includes crossing over from there. They are placed with a black X token each and remain there until the end of the round. At the end of the current round, players must be in an **Oracle (B, M or Palace)** or **Barrack (A, K or Palace)** area. For any player who fails to do so, the VP are reduced by 4.

Hermes: All players start their round with -2 Action Points.

IMPORTANT: If a player is in a restricted area from a previous round, the first Action she must do is exclusively **Move**.

WINNING THE GAME

The Amazon that reaches the highest amount of Victory Points by the end of the 3rd round is proclaimed Queen of the Amazons and wins the game.

SCORING AT THE END OF THE GAME

- Each available Amazon + 1VP
- Any unused Special Ability + 1VP
- Every DI card its passive effect
- Any unused Flag token - 1VP
- Any non-resolved Event from playmat, the corresponding VP penalty
- Bonus or penalty, depending on Supplies
- For unresolved Amazonomachy -5VP
- The corresponding VP from the turn track (only if Sacrifice Action was made)

TIE-BREAKER

In the case of a tie, the player with the most difficult Amazonomachy resolved, wins.

TWO PLAYERS GAME:

- Areas A Δ M are not participating.
- One from each Event Token is removed (5 tokens / color).
- The Event Cards with the less VP points are removed (5 cards/color)

BEGINNING OF THE 2nd AND 3rd ROUND:

- All players remove 1 supply unit.
- Open a hostile god card; the conditions it requires are in action.
- Players' Amazons are again available, Ancillary Amazons move clockwise from player to player.
- Action points are refreshed to 10.
- The last player to score gets +1 Action point, the first -1 Action point.
- Turn changes due to Sacrifices (turn track, if possible).

SOLO MODE

In the Solo game, the same setup is followed as in the game of 2 players, ie **the areas A, Δ, M do not participate** so the available buildings are 6 and not 8. The events are 20, but the available tokens 15. The Ancillary Amazon is randomly selected and remains until the end of the game. The conditions of the Amazonomachy remain the same.

At the beginning of each next round, the game's AI discards 1 Event card from each color stack, if available. For as many events as were removed, as many more tokens must be removed from the board, specifically **the ones closest** to the miniature. If there are 2 tokens of the same color at equal distances, then the one removed is from an area with 2 events. Otherwise, one is arbitrarily selected.

The player's goal is, before the end of the 3rd round, to be able to resolve the 6 events listed on his card as well as an Amazonomachy, without her supply reaching at 0. The victory points are not calculated, so the corresponding conditions / penalties of the gods mitigate.

For a more challenging experience (hard mode), 1 Sacrifice Action and 1 Flag Action are necessary to win.

A simple guide for the beginning of 2nd and 3rd round is as follows:

The player deducts 1 supply unit.

1 Event card is discarded from each remaining color stack (a maximum of 5 cards, if a stack has not been exhausted)

From the area where the miniature is located at the beginning of the round, the closest corresponding tokens are removed

Open a hostile god card; the conditions it requires are in action

The Basic Amazon and Ancillary Amazon become available again.

Turn position changes due to Sacrifice

Action points are refreshed to 10.
